Harvey Weinstein's unprecedented fall from Hollywood's A-list A-crowd to legal ruin has spawned a new incarnation: #MeToo, a Twitter hashtag that's been hashtagged by legions of victims. The term takes its name from the famous feminist slogan "Me Too." The popular fashion magazine Teen Vogue picked up on the #MeToo movement and ran a landmark cover story this week: "The Time Has Come for Women to Have a Say in the Making of Pop Culture." The words cover the issue's headline: "Achieving the impossible: Women in Hollywood." "As the power and influence of women in the workplace grows, a new sort of representation — and a new type of production — is emerging," the magazine's editorial board writes. "According to one former executive we spoke with, the higher-ups are beginning to realize that 'all that diversity, all those girls in the room' is something they should be involved in. But how? And in what ways?" Teen Vogue doesn't sugarcoat the power dynamic when it comes to Hollywood's male-dominated film industry: "Women make up only 20% of production execs, and many women in the business are still struggling to find a senior role. It's common for powerful Hollywood men to refer to them as 'girls,' and for actresses to complain that it's hard to find work after age 30," the magazine's editorial board writes. It's an important conversation. Hollywood is a hyper-masculine industry where women are feared or, if they're powerful enough, flattered by the "cool" power behind the throne. And the typical Weinstein scandal (or "scandal," if the infamous tales of Billy Eichner's alleged sexual harassment and NBC's firing of Matt Lauer will count) might seem at odds with #MeToo's themes of empowerment and solidarity. At the same time, the #MeToo moment isn't the sum of its parts, nor do the movement's best and brightest tout its particulars. Like most feminist efforts, the #MeToo movement isn't so much about shedding light on industry problems, but about the growth of a culture
