“Ever since I played the [ELDRESPIRIT], I've been wanting to see what [level] up system they have that I haven't seen before.... I like this system because it forces the players to choose two different paths in order to level up.” - [GAMER] “The [ELDRESPIRIT] is a fantastic game where everything just falls into place.... It's beautiful and easy to get into, with a fun SRPG-vibe.” - [METAL-FAN] “The game itself is extremely fun, and has the perfect amount of depth, and the story is very interesting.” - [GAMER] Copyright (C) MM2089, All rights reserved. This invention relates to decoys for attracting game birds, and more specifically, to decoys that may be deployed without being detected by the birds. The cultivation of decoys has become increasingly popular among hunters, who enjoy hunting with the aid of decoys. The decoys are usually placed by the hunter when he goes hunting and usually have the appearance of a dead animal. Thus, the hunter may place decoys in a natural setting, or he may choose a decoy that is often times more realistic in the appearance of a live animal. The decoy may be moved about during hunting by either the hunter or his guides. Decoys may be placed near where the hunter hopes to bag a prey, or they may be placed at a location having the appearance of a live animal. While the term decoy is generally understood to refer to the artificial representation of an animal that provides the appearance of a live animal to birds, it also includes the ability to provide the appearance of a dead animal, in the case of making the representation of a dead animal so as to enable the hunter to place the decoy in a spot where the appearance of a dead animal is believed by the hunter to be most effective for attracting wild game. A particular problem for the hunter is that he is typically utilizing equipment that includes a firearm, such as a rifle or shotgun, a scabbard for carrying the firearm, a hunting bag or game bag, and the like. It is difficult for the hunter to place the decoys without putting one of his guns in a position that is inconvenient for its use, if not unsafe. To overcome this problem, hunters frequently place the decoys in a position bff6bb2d33
