“These characters, settings and gameplay will have you wanting more.” Rock, Paper, Shotgun “The more it gets in your way, the more it should get out of your way, let you experiment, and show its own weaknesses. It’s that lesson that’s so hard to teach in modern games.” DeRPG “A smart and visual adventure game that should be on your must-play list.” Pop Pixel “An interesting mix of skill and luck means that you often find yourself experimenting with your character and surroundings to find out what’s useful and what’s not.” Grant Butler “I genuinely found that I would have spent more time with the game if I wasn’t interrupted.”

StarCraft® II: Wings of Liberty® follows the story of the human protagonist, Jim Raynor, who is caught in the middle of a civil war that has raged between two sets of technological worlds: the Terrans, who have colonies across the galaxy, and the Dominion, an evil robotic tyrannical force. He is suddenly found by Mar Sara, a princess of the planet Aiur, and they are thrown into a conflict for control of a powerful weapon that can alter the face of the universe. Featuring a fully voice-acted single player campaign that immerses you in the story and culminates in the galaxy-altering conflict between the Dominion and the Humans; a story filled with dramatic twists and turns, and cinematic cut scenes (all the way through Chapter 2). Key Features: A fully voiced single player campaign with cut scenes, special events, and numerous missions The Zerg represent a completely new creature in StarCraft II. Introducing the Brood, these Zerg are the most terrifying enemy we've faced to date and the most iconic. How did this come about? I was quite surprised to read that all the Zerg are named 'Queen' in the Zerg Swarm Minibots. A horde of corrupted Zerg queens is unleashed upon the universe and spreads over the planet. All fighting force everywhere has to hunt them down and eliminate them and prevent the queen from infecting other planets. This is a very scary sounding game. I can't say much since I haven't played it, but it does look to have a lot of features that will make this one fun to watch. I love that it has the Zerg. I'll be able to play the campaign, but mostly i'm looking forward to the multiplayer (with the new maps and game mode etc.). Looking forward to it, but it'll be a bit of wait... I have it on the hype-stage, but my interest in the game is low until it's released. If I remember correctly, a lot of people on the Beta servers are reporting ghosting problems at times. This is something very few playtesters typically experience and that's why it's kind of important for the Beta to be running smooth before release so that they aren't swamped with questions regarding the last minute fixes. Hopefully (if we get some LOD/performance issues ironed out as they are) it won't be an issue, but it is still a problem worth keeping in mind. Actually,
