Sustainability and Social Responsibility Statement We are based in the heart of Bradford, a city within Lancashire. Our factory is within easy walking distance of many housing estates and in close proximity to the train and bus stations. Our commitment to the local community We do our utmost to play a part in our local community and take pride in our contribution to improving the lives of its residents. We offer our services to a vast and diverse number of local organisations, and we believe that we can make a difference. We work closely with a variety of charities, as well as the local school board and hospital, and we offer our services to local groups and partnerships. We actively work with schools and children's playgroups. We support the local community and organisations that contribute to improvements in safety and education.

Q: Starting the load multiple result set process from an arbitrary row Consider the following table: CREATE TABLE PERSON (PERSONID NUMBER, PERSONNAME VARCHAR2(30)); The entries in the person table have the following structure: PERSONID | PERSONNAME -----+----- 1 | Fred 2 | Tom 3 | Bill 4 | Harry I want to run a query that returns all of the person names and ages in the person table, ordered by the age of the person.

For simplicity sake, let's say I only have a few rows in the table. So we start with one thing to do: SELECT PERSONID, PERSONNAME, AGE FROM PERSON; This returns: PERSONID | PERSONNAME | AGE -----+-----+---- 1 | Fred | 3 2 | Tom | 1 3 | Bill | 2 4 | c6a93da74d
