
Geneko Supercash S Software Download High Quality

[Download](#)

We have been selling our products worldwide. We successfully applied GWR and GWG Cellular Routers for ATMs, Electric Power machines, as well as in Gas, Oil and Heating utilities, Remote farming, Solar PV system, Wind generators and other M2M applications. With their robust design and wide range of operating conditions these are ideal solution for systems that require reliable devices for internet of things application. With huge variety of internet connection possibilities as 3G/4G, ADSL2+ and Wi-Fi, combined with different hardware interfaces Geneko Cellular Routers present one of the best solutions on today's market. Major markets are EU countries especially Germany, France, Italy, Portugal, UK, Poland and Scandinavia, as well Saudi Arabia, Thailand, Indonesia, Myanmar and countries in South and Central America. GPRS terminal with built-in GSM/GPRS module ensures wireless communication of SuperCash S with remote servers. This terminal has its own IP address (fixed or dynamic) and performs two-ways data transfer by GPRS. It is programmable and manageable and equipped with real time clock and internal memory. Data storage into internal memory is performed automatically as well as reading and uploading of report to the server. Geneko ATM is the perfect solution for opening and managing a remote ATM for any type of business. The terminal is mobile and connected directly to the internet, eliminating the need for a fixed system, which provides a wide range of Internet connection types. GSM connection provides reliable communication with the customer remote servers that work in the same carrier as the ATM. The ATM also supports card reader and POS for regular banking transactions. It can be equipped with lcd display and printer, integrated microcontroller, microprocessor, internal GPRS modem, and MS Windows CE operating system.
