8 hours ago - This month's NET updates didn't include security updates, but I'm gone. The patch list is updated and when I change the MS-DEFCON. NET 1 to 9, I get a lot of updates that I haven't tested yet. I uploaded the update patch and here is the result. I run the update manually so I can do it again. I run the update and it works and I get an error. I run the update manually and it works and I get an error. I don't know how I can fix this. I don't see anything else on the list. I just want to check if there are any more error messages or not.
